<b>Course</b>	Advanced Software Engineering (Selenium, Java, web driver)
<b>Database</b>	MongoDB, MySql

## WORK EXPERIENCE

### Software Developer - Frontend Developer Lead

[Website](#) Aug 2023 to Current

Modgenics Technology

- Delivered 20+ client proposals on short deadlines by prioritizing the task and working backwards from the deadline.
- Investigated and resolved complex technical issues, improving application performance and user satisfaction.
- Received recognition for consistently meeting project deadlines and delivering high-quality code.
- Worked closely with cross-functional teams to implement solutions aligned with the client's expectations.
- Led website discussions with 10+ clients to extract critical business insights; transformed findings into actionable project requirements, resulting in a 30 percent reduction in project turnaround time and enhanced client retention.

### Software Developer - Frontend (Intern)

[Website](#) Jan 2023 to July 2024

Modgenics Technology

- Worked closely with cross-functional teams to troubleshoot issues, debug code, and ensure the delivery of high quality software products.
- Implemented **All type of analytics** across various modules using the **Usermaven tool**.
- Participated in code reviews to ensure the quality and maintainability of the codebase.
- Conducted training sessions, enhancing the fellow developers understanding on implementing solutions and improving code quality by 15 percent.

### Software Developer- MERN (Intern)

Jan 2022 - June 2022

Knovatek

- Developed frontend from designs using React.js. Designed overall component tree and routing. Redux was implemented to handle the global state. Common components are developed using Material UI.
- Developed backend REST APIs using Node.js, including middleware for authentication and authorization.
- Created and maintained Postman collections for API testing and documentation.

## PROJECTS

### E-commerce website

[Link to GitHub](#)

Developed and maintained key e-commerce website functionalities, shopping cart, checkout process and **Payment gateway integration**.

- Implemented features for **User account management**, product search and filtering.
- Optimized website performance, enhanced user experience, and ensured mobile responsiveness.

### Movie Web App

[Link to Website](#)

- A React-based application that shows the lists of the latest and popular movies and users can also search a movie by its name, and it also provides all the details about that movie like Releasing Date, IMDB Rating, Actors name, Director name, Budget and Time duration, etc.
- Tech Used: ReactJS, Redux, Bootstrap, CSS.

## EDUCATION

2019 - 2023 B.Tech in Information Technology, **Indian Institute of Information Technology (IIIT), Sonepat**

(CGPA: 8.7/10)
