## EDUCATION

**Indian Institute of Information Technology (IIIT), Sonepat**

B.Tech, Information Technology                 *2019 - 2023*

CGPA : **8.89**

**S G S M S M N N J COLLEGE KHAJEDIH MADHUBANI**

12th Grade                                     *2017 - 2018*

Percentage : **62**

**M R R P HIGH SCHOOL BHATCHAURA**

10th Grade                                     *2015 - 2016*

Percentage : **71**

## EXPERIENCE

**KNOVATEK**

Software Developer - MERN (Intern)       *Jan 2022 - June 2022*

- Developed frontend from designs using React.js. Designed overall component tree and routing. Redux was implemented to handle the global state. Common components are developed using Material UI.
- Designed and developed backend REST APIs in Node.js. Implemented middleware for authentication and authorization. Created postman collection to test and document APIs.
- Tech Involved: **ReactJS, Redux, NodeJS, ExpressJS, MongoDB, MaterialUI, Bootstrap, Postman, GitHub**.

## CERTIFICATIONS

- **Certificate of Algorithmic Toolbox**.
- **The complete Node.js Developer Course**.
- **Modern React with Redux**.
- **HackerRank JavaScript (Basic)**.
- **Certificate of Front-End Web UI Frameworks and Tools:Bootstrap 4**.

## ACHIEVEMENTS

- **1st Rank in GFG College Leaderboard**    Handle
- **Global Rank: 81 (October Challenge 2021 Division 3 ) at CodeChef** Handle

## SKILLS

**Languages -**  • C++ • C • JavaScript • SQL • PHP

**Tools / Technologies -**  • HTML • CSS • ReactJs • Redux • NodeJs • Express • Material UI • Bootstrap • Git • Postman • DBMS • MYSQL

**Database -**  • MongoDB • MySql

**Subjects**

- Data Structures and Algorithms • Database Management System • Object Oriented Programming

## PROJECTS

### Dictionary                                    Source Code

- An application where the user first login or signup and then can add, edit, and delete words. In the application, the user can also search for a particular word from a list of words.
- Tech Used: **ReactJS, Redux, NodeJS ,ExpressJS, MongoDB, MaterialUI, Bootstrap, Postman, GitHub**

### Movie Web App                                 Source Code

- A React-based application that shows the lists of the latest and popular movies and users can also search a movie by its name, and it also provides all the details about that movie like Releasing Date, IMDB Rating, Actors name, Director name, Budget and Time duration, etc.
- Tech Used: **ReactJS, Redux, Bootstrap, CSS.**

### Weather Web App                               Source Code

- An application that gives the weather detail when a user enters their city name at the UI.
- Tech Used: **HTML, CSS, NodeJS.**
